Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 5 and 6 are objected to because of the following informalities: in claim 5, "frangible members" should be -- frangible connectors--, and in claim 5, -- the—should be inserted before "terminal skirt". Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, "said downwardly ... surfaces" lack antecedent basis.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Breuer (5,913,436). Breuer discloses, in figs. 1 and 2, a plastic cap comprising a tamper evident band 11, a plurality of frangible connectors 10, a top surface of the band is downwardly tapered in the direction of the band outer surface, an inwardly bead 12 on

the band inner surface, and a notch on the outer surface of the band relative to the bead.

6. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Carvalho et al. (5,402,901). Carvalho et al. discloses, in figs. 1 and 2, a closure comprising a tamper evident band 2, a plurality of frangible connectors 120, a top surface of the band is downwardly tapered in the direction of the band outer surface, an inwardly bead 20 on the band inner surface, and a notch on the outer surface of the band relative to the bead.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 14-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carvalho et al. Carvalho et al does not disclose the closure comprising copolymer material as claimed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the Carvalho et al closure with copolymer material as claimed, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

9. Claims 16-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Breuer. Breuer does not disclose the plastic of the cap comprising copolymer material

as claimed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the Breure cap with copolymer material as claimed, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Winchell et al., Choksi, and Chartier et al. teach closure caps comprising copolymer of polyolefin.
